PROFILE

I build production AI systems that solve and automate real business problems — intelligent assistants that manage complete customer conversations, multi-agent platforms that run daily operations, and RAG pipelines whose answers teams can trust. Over the past two years I have taken more than 20 such platforms from idea to launch for clients across the UK, Gulf, and Pakistan, owning each one from first design through live deployment.

EDUCATION

BS Data Science — Government College University Faisalabad (GCUF) · Sep 2024 – Present

TECHNICAL SKILLS

Programming Languages	Python · TypeScript · JavaScript · SQL
Frontend & Mobile	Next.js · React · React Native · Tailwind CSS
Backend	FastAPI · Node.js · REST APIs · Pandas
AI & LLM	OpenAI (GPT) · Claude · Gemini · DeepSeek · Whisper · ElevenLabs · DALL·E / Flux · RAG · OCR · Prompt & Context Engineering
Agentic AI	OpenAI Agents SDK · OpenAI Realtime API · LangGraph · LangChain · CrewAI · LlamaIndex · MCP · Multi-Agent Orchestration
Automation & Integrations	n8n · Zapier · Make · Twilio · WhatsApp Cloud API · Instagram Graph API · Gmail · Google Calendar / Maps · HubSpot · Slack · Grafana · Zoom / Meet · LinkedIn / Apollo · Tavily / SerpAPI · FFmpeg
Databases	PostgreSQL · MongoDB · Redis · Supabase · Qdrant · Pinecone · ChromaDB
Cloud & DevOps	Docker · Kubernetes · Dapr · Linux · Git / GitHub · Vercel · Railway · Render
Tools	Claude Code · Claude Cowork · OpenCode · WordPress · Shopify

EXPERIENCE

Agentic AI Developer & Instructor — AxioNet Technologies · Part-time

- Teach multi-agent system design with the OpenAI Agents SDK, taking students from LLM fundamentals through RAG pipelines and workflow automation.
- Guide each cohort through building and shipping a complete agent system of their own.

Full Stack Developer & Agentic AI Engineer — Independent Clients · Freelance

- Delivered more than 20 production AI platforms for clients in healthcare, finance, recruitment, sales, and media — each one scoped, architected, built, and deployed independently.
- Projects range from voice agents and WhatsApp / Instagram automations to RAG-based financial analysis and autonomous research platforms.
- Integrated over 40 third-party APIs — CRMs, calendars, telephony, messaging, and maps — into workflows clients rely on daily.
- Deploy and maintain 7 live client platforms across the UK, Qatar, UAE, and Pakistan.

Web & E-Commerce Developer — Corvit Systems · Internship

- Built and maintained WordPress websites and customized Shopify storefronts for a range of client brands.
- Produced supporting brand graphics for social media, advertising, and web campaigns.

Web Developer — Developers Hub Corporation · Internship

- Developed real-time web applications on the MERN stack, from UI components to REST APIs and database integration.
- Implemented e-commerce features including product listings, user authentication, and cart flows.

Full Stack Developer — Tech Hub Systems · Internship

- Contributed to client website projects such as Hexa Solutions and Yalla.com, working across responsive UIs, REST APIs, and database design.
- Took full stack features across the MERN stack from build through deployment.

FEATURED PROJECTS

CA Practice Suite — Multi-Agent Platform for Chartered Accountants

Next.js · FastAPI · PostgreSQL · OpenAI Agents SDK · n8n · OCR · Qdrant

- Practice-management platform where AI agents read client documents with OCR, track compliance deadlines, and keep the firm's recurring workflows running through n8n.
- Includes a plain-language assistant that assigns work, checks task status, and prepares invoices, which removed most of the firm's manual data entry.

Voice Receptionist — AI Call Answering & Automation Platform

FastAPI · Twilio · OpenAI Realtime API · ElevenLabs · PostgreSQL

- Voice agent that answers real phone calls over Twilio, then books, routes, or escalates each call without human help.
- Built on the OpenAI Realtime API with ElevenLabs voices, so callers hear a natural conversation rather than an obvious bot.

Content Engine — AI Content Repurposing & Video Generation

Next.js · FastAPI · n8n · OpenAI Agents SDK · Whisper · ElevenLabs · FFmpeg · PostgreSQL

- Converts long-form content into ready-to-publish short videos using Whisper transcription, agent-written scripts, ElevenLabs voice-over, and FFmpeg rendering.
- The full pipeline runs through n8n, from picking up source content to delivering the final video.

Multi-Agent Lead & Recruitment Platform

Next.js · FastAPI · PostgreSQL · OpenAI Agents SDK · n8n · Gmail API · LinkedIn / Apollo APIs

- Agents that find candidates, enrich leads, and write personalized outreach across Gmail, LinkedIn, and Apollo.
- n8n keeps the sourcing and follow-up pipelines running on schedule on top of the OpenAI Agents SDK.

AI Financial Analysis & Investment Platform

Next.js · FastAPI · PostgreSQL · Qdrant · OpenAI Agents SDK · Pandas · OCR

- Reads filings and financial documents through OCR and grounds every analysis in a Qdrant RAG pipeline.
- Each answer links back to its source document, so analysts can verify any claim before acting on it.

Autonomous Research & Report Generation System

Next.js · FastAPI · OpenAI Agents SDK · Tavily · Qdrant · PostgreSQL

- Plans its own search strategy over Tavily, then reads, ranks, and stores sources in Qdrant.
- Delivers structured, fully cited research reports with no supervision required.

ADDITIONAL PROJECTS

- **SheSafe — AI Women's Ride-Hailing Platform (Prototype)** — Pakistan's first women-only AI ride network: agent-run safety monitoring, trip tracking, face verification, and SOS escalation. [React Native](#) · [FastAPI](#) · [Redis](#) · [OpenAI Agents SDK](#)
- **WhatsApp Pharmacy Order Automation System** — WhatsApp agent that takes pharmacy orders, checks stock, and handles fulfilment. [WhatsApp Cloud API](#) · [n8n](#)
- **AI Network Operations & Incident Triage System** — agents that watch Grafana telemetry, triage incidents, and resolve customer issues. [Grafana APIs](#) · [OpenAI Agents SDK](#)
- **AI Appointment Scheduling & Reminder System** — natural-language scheduling wired into Google Calendar, with automated reminders and rebooking. [Google Calendar API](#) · [n8n](#)
- **Dental Patient Engagement & Intake System** — patient intake, reminders, and follow-ups for dental clinics, all over WhatsApp. [WhatsApp API](#) · [OpenAI Agents SDK](#)
- **Multi-Agent Social Content Generation Platform** — agents that plan, write, and illustrate branded posts, then publish via the Instagram Graph API. [DALL·E](#) / [Flux](#) · [n8n](#)
- **Instagram DM Automation & Lead Qualification System** — qualifies leads, answers product questions, and syncs every conversation to a CRM. [Instagram Graph API](#) · [n8n](#)
- **AI Meeting Transcription & Action Intelligence System** — Whisper-powered transcription, summaries, and action items from Meet and Zoom calls. [Whisper](#) · [Meet](#) / [Zoom APIs](#)
- **RankWizard — AI Content & Website Analysis Platform** — generates website ranking and backlink reports from a URL, and writes AI blog articles with audio / podcast output. [Full Stack](#) · [AI Integration](#)

SELECTED CLIENT ENGAGEMENTS

- **Royal Global Services (UK)** — built the corporate website for a digital transformation and AI solutions company. [royalglobalservices.co.uk](#)
- **Technical Printing (Qatar)** — built the corporate site and service catalogue for Qatar's premier printing press. [technicalprinting.qa](#)
- **Aroma Restaurants (UK)** — built the restaurant's web platform with menus, online ordering, and reservations. [aroma-restaurants.com](#)
- **Khaleej Repair (UAE)** — built a lead-generation site with WhatsApp booking for a 24/7 appliance-repair service. [khaleejrepair.com](#)
